

FIRE COMMUNICATOR (ADC-FC100)

Commercial Fire Communications

The Fire Communicator (ADC-FC100) enables reliable and cost-effective commercial fire monitoring through Alarm.com. Secure business properties and stay informed with real-time alerts and automated reports, all from one unified platform.

Key Features

Dual Path Reliability

Dependable connection with redundant communication paths over broadband and LTE.

Carrier Auto-Select

Automatic SIM selection of the strongest carrier available for maximum reliability.

Real-Time Alerts

Sends event notifications to customers and signals the monitoring station simultaneously.

Extensive Compatibility

Integrates with existing fire control panel via phone line or supervised relay output.

Fire Safety Certified

UL Listed and NFPA 72 compliant for adherence to safety codes and resilient system operation.

Remote Updates

Automatic updates, managed by professionals, without costly on-site visits.

Ask your security provider about the Fire Communicator.
